Technology partnership

Anunaki Ventures Ltd seeks technology partners to accelerate AI-native product development. The immediate need is capacity, not an assumption of commercial traction.

Server and cloud infrastructure

Dedicated servers, compute credits, storage and test environments for parallel agent workloads.

Development workstation

High-performance hardware for local AI workloads, builds and development experiments.

AI-agent capacity

Higher usage limits, advanced model access and tools for controlled agent workflows.

Partnership approach

Discuss suitable resource access, scope, duration and measurable milestones with the founder.
Potential collaboration includes cloud credits, hardware provision and technical support.
